**Primary Characteristics**

- ▶ **Optically Clear**
- ▶ Easily pourable
- ▶ Addition cure
- ▶ Primer required
- ▶ FDA Approved

**Use for:**

- ▶ Solar cell potting
- ▶ Optical instruments
- ▶ Applications requiring visual identification of potted assemblies
- ▶ Food applications

Excellent for potting solar cells for maximum light transmission and electronic assemblies where component identification is desirable. This two part silicone is supplied with a curing agent. [Primer](#) required. Cures at room temperature. Has low viscosity allowing easy flow in and around complex parts, providing excellent electrical insulation and shock resistance. Clarity permits visual inspection for easy identification and repair of encapsulated parts. Excellent retention of elastomeric properties at temperatures up to 204°C (400°F). Will cure in deep sections or enclosed assemblies without exotherm and with low shrinkage. Can be used in food contact applications where FDA 21 CFR 177.2600 regulations apply.
