

MFC₁ Staticide® Microfiber Cloth

Lint-free, chemical-free alternative!

Reduce your budget while cleaning safely. The Staticide® Microfiber Cloth's sturdy construction lifts dirt, dust, and oil with or without the use of chemicals.

In one motion, this cloth can eliminate the need for harmful cleaners and disposable wipes. This material naturally attracts dust and can withstand multiple machine washings.

This material is soft enough to be safely used on delicate surfaces without scratching. Its light blue color and embossed border make this attractive and fashionable cloth a lovely accessory for the work table, desk, briefcase, and handbag.

Easy to Use:

For the best performance, soak cloth in water prior to initial use and allow it dry. This will remove any dust from packaging or manufacturing. For dusting, use dry. For cleaning, dampen with water. Avoid oversaturation. If electing to use a cleaner, avoid detergents with bleach and abrasive materials like silica.

Once dirty, hand wash under warm water with liquid detergent or machine wash on a regular cycle. Avoid washing with linty items like towels. Do not use bleach or fabric softeners. Do not iron.

Product # MFC₁ 72 wipes per case

Ideal for the following applications:

- Removing smudges from compact discs, cell phones, televisions, flat screens, and computer monitors.
- Cleaning camera, microscope, and optical lenses
- Maintaining laboratory instruments
